

MCSA: Windows Certification Preparation

Certificate

Overview

This program is designed to prepare students to write the Microsoft Certified Solutions Associate (MCSA) Windows 10 certification exams.

The MCSA Windows 10 certification demonstrates knowledge and skills in working with Windows 10 and validates ability to support end users and maintain systems and mobile devices that run Windows 10. In this program student obtains the skills and knowledge required to install, deploy, and upgrade to Windows 10, including ensuring hardware and software compatibility. Additionally, student learns how to configure system settings, Windows security features, network and remote connectivity applications, and mobile computing, as well as various troubleshooting tools and techniques that enable them to address Startup, Group Policy, user profile, logon, and performance issues in Windows 10 in an enterprise network environment.

Benefits

- Industry recognition of knowledge and proficiency with Microsoft Windows 10 operating system
- Certification that is internationally recognized
- Increase marketability in the workplace

Requirements for MCSA Windows 10 Certification

MCSA Windows 10 candidates are required to pass two exams: 70-697, and 70-698 exams.

Admission Requirements

A British Columbia Secondary School Diploma or equivalent with prior education in English at grade 10 level or higher.

OR

Mature students who pass an entrance evaluation demonstrating sufficient ability (i.e., English comprehension and math skills) to undertake the program.

All applicants must demonstrate English proficiency through one of the above requirements or through an English language assessment (IELTS 5.5 or equivalent).

Program Prerequisites

A candidate should have at least one year of experience in the IT field, as well as experience implementing and administering any Windows client operating system in a networked environment.

Career Opportunities

- Technical Support Specialist
- Field Service Technician
- Support Services
- Helpdesk Support Analyst
- Desktop Support Technician

Program Notes

Students must pass all courses and achieve a 75% program average to earn a certificate.

All current Microsoft certification exams are computer-based tests administered through independent testing agency Prometric.

Course Notes

This program features online lectures, assignments, summaries, and simulated online labs in addition to accompanying student manuals.

Program Classification

Information Technology

- Network Services & Administration

Training Path

Industry Certification

- MCSA: Windows 10

Method of Delivery

Online training supported by qualified Academy of Learning College learning coaches or online instructors.

Courses
